

Press Release

26th January 2017

SPI Lasers

(“SPI” or “the Company”)

SPI Lasers sells Lamp Pumped Nd:YAG Laser business

As of the 1st March 2017, SPI Lasers will complete the sale of its Lamp Pumped Nd:YAG Service and Support business to TJS, Inc as part of its plans to remain focused on the fiber laser market and its commitment to innovate, manufacture and support premium quality fiber lasers.

The business, purchased during the acquisition of JK Lasers back in 2015 no longer fits with the fiber laser focused goals of the company and is being sold to ensure these goals remain a priority, as well as simultaneously ensuring a high level of customer service and support is maintained for all owners of JK/SPI Lamp Pumped Nd:YAG lasers.

SPI Lasers CEO Thomas Fehn, stated:

“Our challenge at SPI Lasers is to continue to increase both the power and peak performance of our fiber lasers; the service and support of Lamp Pumped Solid State Lasers (LPSSL) no longer fits with this vision. In order to remain focused on our long term goals and ensure we remain committed to offering the very best levels of customer service and support we felt the time was right to sell the Lamp Pumped Service & Support business. In TJS I strongly believe we have found the ideal business partner to offer outstanding levels of service and support, ensuring customers can rest easy in the knowledge that their lasers will be efficiently maintained and supported for many years to come.”

Headquartered in Denville, New Jersey, USA, TJS, Inc. will continue to provide technical support, consumable components, service and repairs for the JK/SPI Lamp Pumped lasers from their manufacturing and technical facility in Sanford, Florida.

TJS CEO Anthony Molee commented, “Our customers are our top priority, we are confident that we will offer all JK/SPI LPSSL customers the very best levels of global after sales support. We very much look forward to building effective relationships with our latest customers”.
